

## TOOLS FOR SUCCESS - SUCCESS STORIES

**I believe that this course is a positive turning point in my life.** The training (English language, Digital skills, and Soft skills) helped me build and develop my skills, which I used to see as weaknesses that prevented me from developing my personality and work life. Joining the classes and engaging in the learning process with other participants increased my self-confidence and determination. It pushed me to make an important shift in my life as I decided to continue my education because I now believe that there is nothing impossible in the hope of achieving success.
