

TOOLS FOR SUCCESS - SUCCESS STORIES

The English Language course I received with the “Tool for Success” program significantly improved my English language skills. **Actually, it was the key that opened the door to success for me.** After the training, I have got the opportunity to go for an overseas job interview in the English language, and thankfully I was able to ace it. Today I am working in Turkey and I am using the English language skills I have developed with the Tools for Success project to communicate with the staff and the surrounding community.
